STATEMENT OF CONFIDENTIALITY
The following material contains Safety Boss Inc. confidential and proprietary information. No part of this document may be disclosed, printed, copied or disseminated in any form or by any means, without prior permission from Safety Boss Inc.

Our Vision

To be the best fully integrated Health, Safety, and Environmental Company supporting and providing **"OPERATIONAL EXCELLENCE"** to organizations worldwide.

Our Mission Statements

We promote a **Positive** work environment to ensure all our employees feel valued and secure in a harassment free workplace.

We promote an **Incident Free** work environment through the use of our behaviour based safety culture, training and proactive assessment of hazards and risks.

We promote **Diversified** services to ensure a wide range of HSE requirements providing a "one stop" concept for our customers and offering multiple career opportunities for our employees.

We promote an **Interdependent** workplace culture through **Respect**, **Empowerment** and **Trust** in our employees.

We promote creating our own **Economy** to ensure we control the outcome of profitability and job stability.

Our Core Values

We are committed to creating a **Work Family** through mutual **Trust** and **Respect** among all employees.

We are committed to operating with **Loyalty** and **Reliability** between our employees, customers, and the public.

We are committed to operating with **Professionalism** in all our activities between our employees, customers, and the public.

We are committed to conducting all of our business with the highest degree of **Integrity** and **Honesty** between our employees, customers, and the public.

We are committed to supporting and guiding our employees to **Success**.

About Us

OUR EVOLUTION - 60 YEARS AND COUNTING...

Founded in 1956 by K.J. “Smokey” Miller, Safety Boss has grown from a one-truck fire company into a fleet of safety, loss-prevention and emergency response equipment . The company is operated and managed by the industry’s leading team of safety professionals.

Currently we are headed by Mike Miller, son of the company’s founder. Taking over the family business in 1979, he created a new direction for the company based on his vision. Originally rooted deep in Alberta’s oil patch, Mike expanded the company internationally in the early 1980’s by forging our world renowned well control reputation. To date we have successfully controlled more than 800 emergency events, including several of the largest blowouts and firefighting projects in the world.

Moving forward we continue to diversify by providing comprehensive prevention, detection and response safety services to the Oil and Gas, Construction, Forestry, Mining and Processing industries worldwide. Striving to improve ourselves and the equipment we offer is how we will accomplish our goal of operational excellence for our partners in industry.

“We have no desire to be the biggest... just the best.”

-Mike Miller-

The Science of the Badick Series

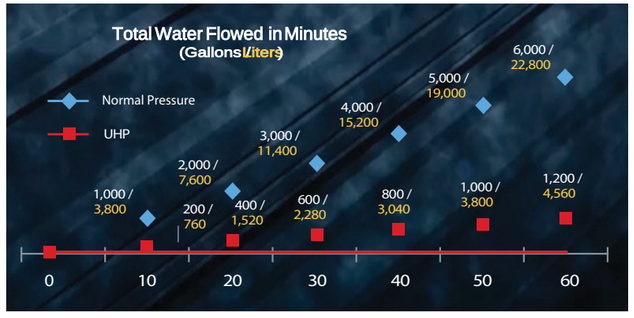

What is UHP and how has it changed the way we fight fires?

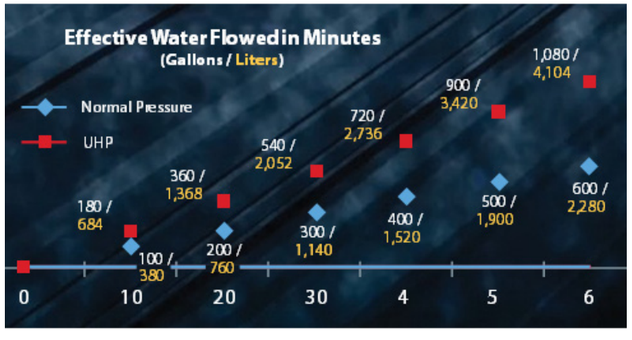

UHP – The Practical Application

When a droplet from a Normal Pressure water stream enters a fire area, it has the potential to convert all of its mass to steam. In reality, only about 10% of that mass will convert to steam and cool the fire. When a droplet from a UHP water stream enters a fire area, that droplet will convert about 90% of its mass to steam. This explains the significant difference in efficiency between the two streams. Together, the smaller UHP droplets comprise more surface area than Normal Pressure water droplets. This is why they have the ability to cool more efficiently.

So, let's compare a 100 gpm (400 L/min) Normal Pressure hand line at 10% efficiency with a 20 gpm (80 L/min) UHP hand line with 90% efficiency. The total volume of water flowed by the two streams over time is illustrated in the following chart.

The volume of water for the Normal Pressure stream exceeds the UHP stream by a factor of five. Now let's compare the volume of water in the two streams that is actually cooling. Remember, the efficiency for the Normal Pressure stream is 10% while the efficiency of the UHP stream is 90%. The comparison looks like this:

What we can see from this example is that while the Normal Pressure stream flowed five times the volume of water as the UHP stream, the UHP stream actually outperformed the Normal Pressure stream by 80%. This can be a significant advantage when one considers the resources (both equipment and manpower) required to flow the added volume of water.

SAFETY BOSS INC. - A FULL SERVICE INTERNATIONAL SAFETY COMPANY

"As for wildland applications, the (UHP) stream can penetrate into the ground up to seven inches, allowing for more complete extinguishment, less re-ignition potential and easier mop-up operations"
Jennifer Laine
HMA Fire

UHP (Ultra High Pressure) Combination Fire Truck

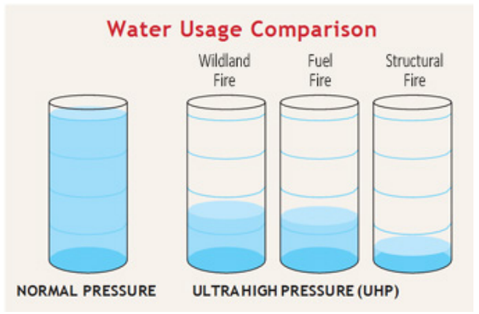

The Details

- Independent Fire / Shower Decontamination System
- 105 GPM / 1350 PSI UHP Pump
- 100 GPM Joystick Controlled Roof Mount Turret
- 400 Gallon Water Supply
- 30 Gallon Foam Supply
- Dual 250' x 1/2" HP Hose Reels per Side
- 2 x 20 GPM Dual Action Foam Gun
- 2 x 20 GPM Bail Handle Structure Fire Nozzle

The Advantages

- Reduced water requirements with increased attack time
- Reduced environmental impact due to water and fuel usage
- Reduced stationary site footprint
- Increased mobility for quick setup and attack
- Standard package pump operator is not required allowing for dual fire fighter attack ability

Custom Designed and Made in Canada

More with less

The following link is to a video showing the power of Ultra High Pressure pump during testing. This video shows the statistical advantages of our Badick UHP firefighting system on an F-550 wheeled platform when compared to conventional combination industrial firefighting units.

Exceptional Equipment and Personnel

Since 1956 Safety Boss has provided comprehensive safety prevention, detection and response services.

From the hundreds of emergencies we have responded to and the everyday projects we work on, our commitment has always been providing the highest quality of safety equipment and personnel to our customers. We fulfill this commitment by working towards our mutual goals with integrity, respect, trust, diligence and continuous improvement.

"Orica Carseland Works contracted Safety Boss to provide security, safety watch, high angle rescue, EMT and paramedic requirements for Carseland's turnaround held in June 2017. Safety Boss' employees were both profes-sional and well trained. I would highly recommend them for future work."

Barry Maloney
Orica Canada Inc.

H2S Safety Services

- Personal and Standalone Gas Detection
- High Pressure Breathing Air Units
- H2S Safety Supervisors

Medical Services

- EMR / OFA III, PCP and Paramedic Professionals
- MTC and ETV Units
- Medical Trailers

Fire/Shower Protection and Response

- Combination Fire/Shower Units
- Dry Chemical Systems
- High Volume Pump Skids
- Compressed Air Foam (CAF) Trailers
- Wildland Firefighting Skids

Industrial Services

- ERP and Rescue Plan Design
- Bottle Watch, CSE Monitoring, Spark Watch
- Rescue Services
- Safety Advisor, NCSO, CRSPs
- Plant Turnaround Safety Planning

Training Services

- All Standard Oil and Gas Courses
- Over 400 Online Safety Training Courses

Special Services

- Well Control and Blowout Recovery
- Freezing Services
- On and Off Shore Packages Available
- Worldwide Emergency Response

Rental Services

- Breathing Air Equipment
- Gas Detection
- Fire Suppression Systems
- Mobile and Standalone Medical Units
- Rescue Equipment

Testing Services

- Facial Fit Testing
- Drug and Alcohol Testing
- Audio-Metric Testing

COVID-19 Worksafe Services

- Workplace Action Plan and Employee Awareness
- On-site COVID-19 Employee Screening
- Workplace Deep Cleaning & Disinfection
- Workplace Hand Sanitizing Stations

Fire/Shower Services

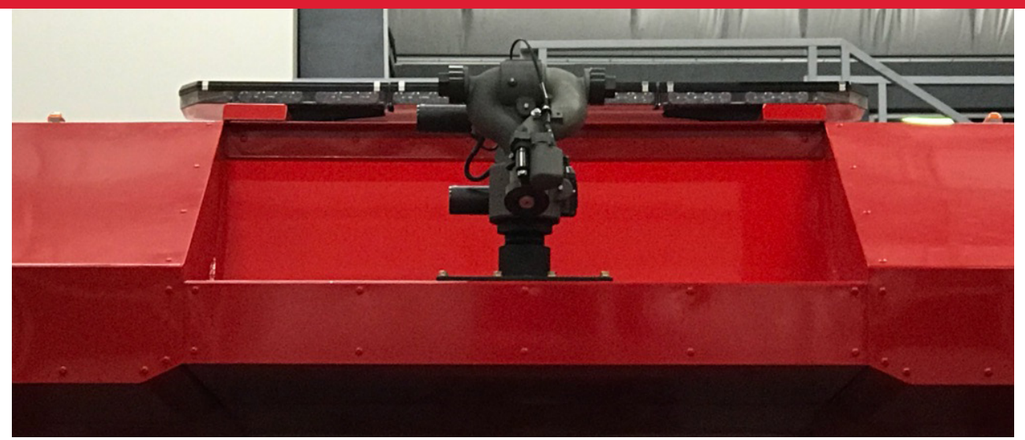

From our fleet of custom fire equipment to our highly trained fire fighting crews, we lead the industry in fire prevention, detection and response.

- *Standby Fire Protection*
- *Well Control / Emergency Response*
- *Wildland / Urban Interface*
- *Camp and Asset Fire Protection*
- *Fire Suppression Rentals*
- *ERP Development*

"Your people acted with expedience and diligence and at times, downright bravery in helping us control the well."
J.E. Routledge
Mobile Oil Canada, LTD.

EQUIPMENT

Constantly meeting the ever changing demands of the industry through innovation.

- *Smokey Series Combination Fire / Shower Unit*
- *Badick Series Ultra-High Pressure Combination Fire / Shower Unit*
- *Shower / Decontamination Unit*
- *Compressed Air Foam Trailer (CAF Unit)*
- *Skid Pump and Trailer Suppression Packages*
- *Wildland Fire Skid and Trailer Packages*

PERSONNEL

Going beyond industry and NFPA standards, Safety Boss personnel receive custom internal training. We also encourage employees to be involved with municipal and volunteer departments maintaining practical skills while supporting local communities.

- *NFPA Certified*
- *Custom Internal Training*
  - *Industrial Safety Development Program*
  - *Diversified Safety Skills Training Program*

Well Control Romania

Well Control / Blowout Response

Over **800** *Successful Well Control Responses Domestically and Internationally.*

- *Established in* **1956**
- *Specialized Equipment*
- *Experienced Well Control Specialists*
- *Mechanical / Environmental Engineers*

If you are interested in a more in-depth well control / emergency response presentation please call your local sales representative to arrange a FREE learning session.

To watch Safety Boss take you through the process of capping a well in Eastern Europe visit: www.youtube.com/watch?v=s1IbfokGr0Y

SAFETY BOSS INC. - A FULL SERVICE INTERNATIONAL SAFETY COMPANY

Experience the difference with Canada's Oldest Blowout Company

Michael Miller

- Well Control Consultant
- 50 Plus Years' Experience
- Safety Boss CEO
- Provides on-site and executive consultation services
- Worked and supervised on more than 800 domestic and international well emergencies

With over 50 years' experience in the oil and gas industry, Mike has gained an impressive range of project experience working on critical sour operations, extreme blowout emergency calls, and commanding the crews in the famous Kuwait Oil Fires.

Mike's experience and vast knowledge makes him an exceptional mentor for the next generation of well control professionals.

Curtis Wright

- Well Control Crew Chief
- Well Freeze Supervisor
- 25 plus years' experience

With over 25 years' experience in the oil and gas industry, Curtis' experience has been dedicated to providing professional Health, Safety and Emergency Response services on a variety of projects.

Curtis has participated and supervised numerous domestic and international well emergency operations. His extensive knowledge and professionalism allows him to work with both crews and site managers to achieve health and safety solutions, provide contractor oversight and promote a positive safety culture for any organization.

Nelson Hertz

- Well Control Crew Chief
- Well Freeze Supervisor
- Worked and supervised over 40 well emergencies

With over 15 years' experience in the oil and gas industry, he gained an impressive range of project experience working on a variety of upstream operations, plant maintenance projects, new infrastructure projects and blowout emergency calls.

Nelson has participated and supervised numerous domestic well emergencies operations. His leadership and comprehensive knowledge base makes him a crucial member of our well control team.

Wildland Services

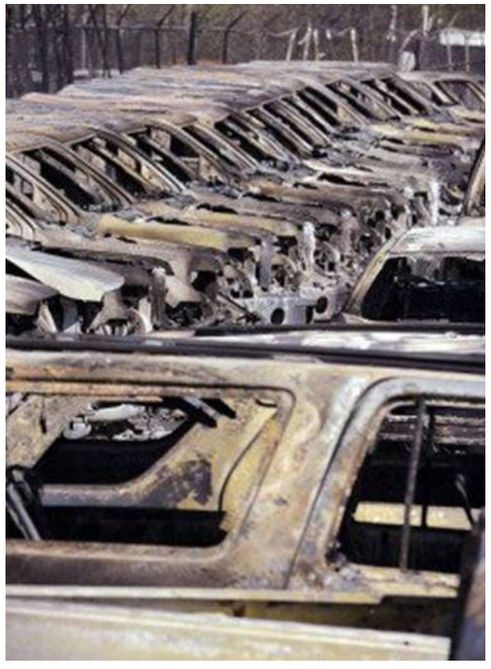

Innovative Solutions For Protecting The Environment And Your Property

- *Wildland Firefighting*
- *Urban Interface*
- *Asset Protection*
- *Standalone Rental Packages*
- *Consultation Services*
- *Emergency Response Planning*

Safety Boss has embarked on a program of expansion to support both the private sector and public responders. Our role is primarily one of sustained action response in Type 3 and above wildfires as well as asset protection, initial response and special operations.

We have also developed unique logistical support, decontamination, breathing air, and compressed air foam delivery systems.

Our training department features our ICS Canada ICS training, NFPA and Alberta Type II Wildland Firefighter courses that serves both wildland and private and public responders.

SAFETY BOSS INC. - A FULL SERVICE INTERNATIONAL SAFETY COMPANY

BADICK SERIES "UHP" COMBINATION FIRE TRUCK

Ultra-High Pressure Firefighting Module

- Independent Fire / Shower Decontamination System
- 105 GPM / 1350 PSI UHP Pump
- 100 GPM Joystick Controlled Roof Mount Turret
- 400 Gallon Water Supply
- 30 Gallon Foam Supply
- Dual 250' x 1/2" HP Hose Reels per Side
- 2 x 20 GPM Dual Action Foam gun
- 2 x 20 GPM Bail Handle Structure Fire Nozzle

Custom Designed and Made in Canada

UHP & VOLUME FIRE SUPPRESSION SKID

- 30 to 80 GPM Pumps
- Trailer or Deck Truck Mounted
- 275 Gallons Water Supply / 10 Gallons of Foam
- 1% to 6% Foam Eductor
- 200' x 1" Hose Reel
- 4 x Shovels, Rakes, Polaskis
- 4 x 5 Gallon Poly Back-Pack Pump Tank
- Drafting hose included
- Capacity to refill form external water source
- Compliant to Alberta Forestry Inventory Requirements

UNIMOG WILDLAND ATTACK VEHICLE

- 4 Wheel Drive Mercedes-Benz Unimog
- Akron Firefox Remote Front Bumper Monitor
- 500 GPM Pump
- 840 Gallon Water Supply

LOGISTICS UNIT

- Small Motor Repair
- Hand Tool Maintenance
- Water Supply, Fastanks/Frac Tanks
- Site Flood Lighting System
- Firefighter Rehab

CERTIFIED EXPERIENCED PERSONNEL

- NFPA Certified
- S100 / S215 Certified
- We have established relationships with Indigenous communities offering highly trained personnel available to work with Safety Boss crews.

Medical Services

Dr. Edward Schaffer, MD

Medical Director

Dr. Schaffer comes with years of experience both as a field safety medic and industrial safety company medical director. This team addition allows us to offer a higher level of medical coverage in British Columbia such as Primary Care Paramedic (PCP) and Advanced Care Paramedic (ACP).

Sarah Lowe

Medical Coordinator and Occupational Health Technician

Sarah Lowe is our Medical Coordinator and Occupational Health technician. Based out of our Edmonton, AB office, Sarah has been with the company since 2009. With her medical background as an LPN, Sarah is committed to maintaining positive and continued growth with the medical division and positive mentorship with the medical employees.

Working closely together, they have approved provincial use of protocols, maintained best practices, ongoing training and development- setting the industry standards high for field medical response.

SAFETY BOSS INC. - A FULL SERVICE INTERNATIONAL SAFETY COMPANY

We offer multiple levels of standby and emergency response medical services across Western Canada.

Paramedicine is continually evolving, and so are we.

EQUIPMENT

Our fleet is versatile, mobile and ready for the industry's toughest conditions. All units are stocked to meet OH&S standards, have heated patient areas and are available with or without our industry leading medical personnel.

- *Mobile Treatment Center - MTC*
- *Emergency Transport Vehicle - ETV*
- *Medical Office Trailer*

PERSONNEL

In both standby and emergency situations, our medical personnel are industry leaders. All Safety Boss medical staff follow the guidelines set out by the Alberta College of Paramedics and WorkSafeBC.

- *Emergency Medical Responders - EMR*
- *Primary Care Paramedic - PCP*
  Advanced Care Paramedic - ACP
- *Occupational First Aid Level 3 - OFAIII*

Safety Services

Safety is our priority and since 1956 it has been our name.

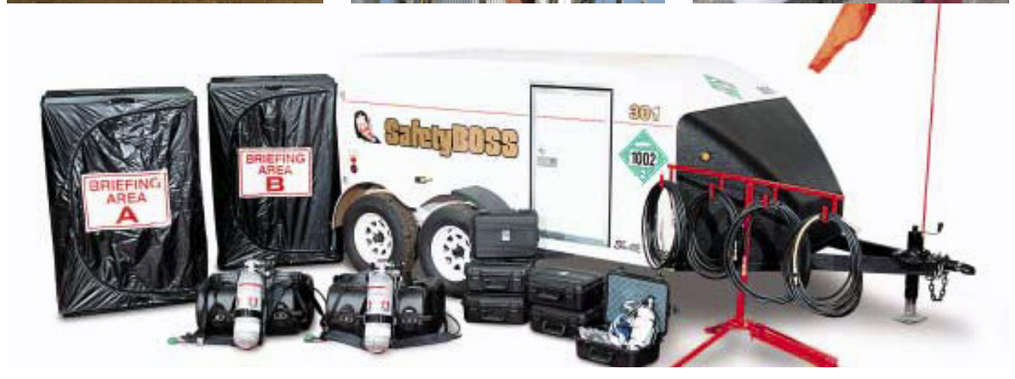

From upstream to downstream, new construction to scheduled maintenance and prevention to response services, we are the leading industrial Safety Company.

- Plant Turnaround / Shutdown Planning
- H2S Safety Supervision
- High Pressure Breathing Air Units
- Confined Space Monitoring and Rescue
- High Angle Rescue
- Spark / Safety Watch
- General Construction Safety
- Personal and Standalone Gas Detection
- Equipment Rentals
- Equipment Service & Maintenance
- Air Quality Monitoring
- ERP and Rescue Plan Design

"I definitely recommend Safety Boss, they are leaders on our site and they have proven to be a service provider that requires little management effort."
Dave Collin
Pembina Pipelines

EQUIPMENT

We rely on cutting edge equipment to keep your project safe. All of our equipment is available for rent or purchase. Maintenance and repair services are available on or off location.

- *Breathing Air Trailers*
- *SCBA and SABA*
- *Portable Gas Detection*
- *Remote / Stand-alone Gas Detection*
- *High Angle Rescue Kits*
- *Confined Space Rescue Kits*
- *Mobile Air Quality Monitoring Unit*
- *Sales, Service and Maintenance*

PERSONNEL

We offer a full roster of Safety Professionals available for pre-project planning to project completion. Our industry leading team is prepared to deliver the prevention, detection and response you require.

- *National Construction Safety Officers (NCSO)*
- *Canadian Registered Safety Professionals (CRSP)*
- *Safety Advisors*
- *Turnaround/Shutdown Coordinators*
- *Project Safety Coordinators*
- *H2S Safety Supervisors*
- *High Angle Rescue Technicians*
- *Confined Space Rescue Technicians*
- *Safety/Spark Watch Personnel*
- *Gas Detection Personnel*
- *Air Quality Technicians*
- *Equipment QC Technicians*
- *NORMS Detection Personnel*
- *Lease Security*
- *Road Block Personnel*
- *Rover Personnel*
- *Safety Administrators*

Mountain Slope Rescue Services

Protecting Workers in Aggressive Mountain Terrain

In 2019 the historical first construction steps of the Coastal Gas Link project commenced and with it brought the unique challenge of protecting workers throughout the aggressive mountain terrain of this beautiful province.

To meet this protection challenge Safety Boss has created this Mountain Slope Rescue package detailed in the following pages.

SAFETY BOSS INC. - A FULL SERVICE INTERNATIONAL SAFETY COMPANY

During pipeline operations, from clearing to mainline, to backfilling and restoration workers are exposed to various hazardous operations in low to high angle mountain and slope terrain. In addition remote wilderness, extreme weather conditions and high traffic rates on newly constructed unfamiliar roads add even more vast challenges.

Because of this all MSR Technicians are trained to the NFPA 1006 Technician standards coupled with project specific training such as but not limited to:

- Review of basic rope rescue systems. (Knots, anchors, mechanical advantage, etc..)
- Advanced knot craft. (Beyond the 8)
- Advanced anchoring (Multi-point complex, Inline back-up, etc.)
- Complex mechanical advantage systems (Understanding reset factors, physics of MA systems, knot passing)
- Artificial High Directional (Natural and Manufactured)
- Advanced Slope Rescue (Basket positioning vertical/horizontal)
- Offsets (Guiding and Tracking lines)
- High lines
- Medical Considerations in the Wilderness
- Aztek Familiarization

In addition to the rope rescue and wilderness capabilities above, MSR technicians can be cross trained to meet other project safety needs such as but not limited to:

- Confined Space Rescue Monitoring Supervision and Rescue Response
- General Gas Detection
- Traffic Control
- Rescue Plan Design and Implementation
- Mobile Guiding Support
- Wild land Fire Suppression
- Hot Work Supervision

These skill and training options allow our technicians to be imbedded into your safety system for the highest possible project coverage and usage.

Occupational Health Services

Our Occupational Health Division is your "PREVENT" and "DETECT" strategy for first line safety management.

Drug & Alcohol Testing

- *Pre Employment Testing*
- *Pre Access Testing*
- *Post Accident Testing*
- *Reasonable Suspicion Testing*

Drug Lab Test (Urine 7 panel DOT and Non-DOT)

- *Collected and then sent for testing in a SAMHSA and DOT certified laboratory*
- *Negative results will be returned within 24 hours from receipt*
- *Non-negative results within 48-72 hours of receipt.*

Alcohol Testing- (DOT approved)

- *Legally defensible*
- *Breath Alcohol Concentration (BAC) is tested immediately*
- *No lab time required – mobile, immediate screening*

Industrial Hygiene

Hazard Risk Assessment – Chemical, Noise, Radiation, and other hazard materials

COVID-19

- *Workplace Action Plan and Employee Awareness*
- *Onsite COVID-19 Employee Screening*
- *Workplace Deep Cleaning and Disinfection*
- *Workplace Hazard Hand Sanitizer Stations*

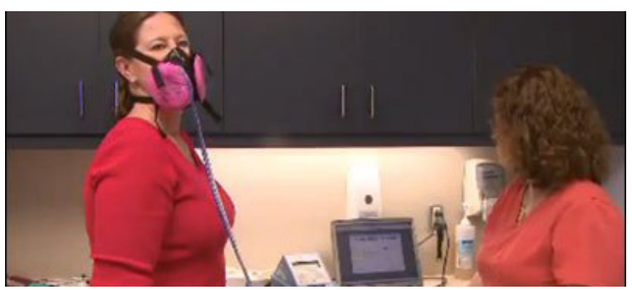

Facial Fit Testing

Qualitative Fit Testing

- *A qualitative fit test is a pass/fail test to assess respirator fit based on the individual's response to a test*

Quantitative Fit Testing

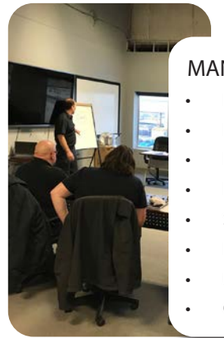

- *A quantitative fit test assesses respirator fit by numerically measuring leakage into the respirator with a PortaCount fit test machine.*

International Services

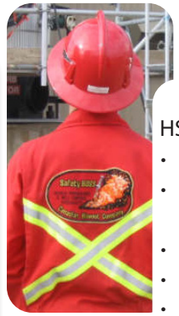

- Risk Assessments
- HSE Planning
- Safety Intervention
- Interdependency
- Report Unsafe Acts
- Incident Investigations
- Employee Coaching
- Employee Feedback
- Root Cause Analysis
- Corrective Actions
- Employee Awareness
- HSE System Monitoring

MANAGEMENT LEADERSHIP

- Personality Diversity
- Personal Empowerment
- Emotional Intelligence
- Effective Communication
- Situational Leadership
- Big Picture Thinking
- Motivational Skills
- Conflict Resolution

HSE ADVISORS

- Implementation of HSEMS
- (Health Safety Environmental Management Systems)
- Incident Investigations
- Risk Assessments
- Safety Meeting Content
- Encouraging Safety Culture
- Recommendations for Improvements

SAFETY LEADERSHIP

- Risk Assessments
- Stop the Job
- Unsafe Acts / Conditions
- Positive Safety Intervention
- Safety Meetings
- Incident Investigation
- Contractor Oversight

ENVIRONMENTAL MANAGEMENT

- Environmental Impact Assessment
- Mitigation of Risk to Wildlife
- Bio-Remediation Technical Procedural Writing

Training / Education Services

Customized training allows you to build a course plan that meets your needs and timeline at the lowest possible cost.

Our Advantage

- Free Consultation
- Standardized course delivery
- Client specific packaged programs
- Highly qualified, industry recognized instructors
- Competitive pricing and discount packages
- All courses available at our location or yours

ONLINE TRAINING IS NOW AVAILABLE AT WWW.SAFETYBOSS.COM

- More than 400 online industrial safety training courses.
- Complete your safety courses online today and get industry recognized certifications at your convenience and schedule.

SAFETY BOSS INC. - A FULL SERVICE INTERNATIONAL SAFETY COMPANY

"The degree of professionalism and the content of your course led to a great many positive comments from our personnel. More than a few said that it was the best fire training course that they had attended."
D B Behan
Shell Burnt Timber Complex

Some of our courses include:

Field Safety Training

- H2S Alive
- First Aid & CPR
- Confined Space Entry / Monitor
- Confined Space Entry and Rescue
- Industrial / Commercial Fall Protection
- Gas Detection
- Respiratory Protection
- Fire Extinguisher Training (live fire props)
- Bear Awareness
- Wilderness Safety
- Fire / Spark Watch
- Trenching and Excavating Safety
- Asbestos Awareness

Certified Driver Training

- Oilfield Driver Awareness (ODA)
- Hours of Service Training
- Fatigue Management

Management Leadership Development

- Personality Diversity
- Personal Empowerment
- Emotional Intelligence
- Effective Communication
- Situational Leadership
- Big Picture Thinking
- Motivational Skills
- Conflict Resolution

Safety Leadership Development

- Risk Assessments
- Stop the Job
- Unsafe Acts / Conditions
- Positive Safety Intervention
- Safety Meetings
- Incident Investigation

Indigenous Relations

Respect | Opportunity | Support

The Louis Bull Tribe invited us into their community to demonstrate the Badick Series Combination Fire Truck and its many benefits and features. The Ultra-High Pressure unit is the first of its kind in Canada and in the industry. Safety Boss worked with the community leaders to custom build an ultra-high pressure fire truck to fit the community needs. The truck is now being used by the dedicated community firefighting team to respond to fires in the community and surrounding area.

SAFETY BOSS INC. - A FULL SERVICE INTERNATIONAL SAFETY COMPANY

Career Development Fair

We have participated in several Indigenous Community Career Development Fairs. We enjoy the time spent with the attendees and showing off our new equipment, such as our Badick Series fire truck.

Whitefish Lake First Nation #128

and Safety Boss partnered in an agreement to deliver a training program in the community.

Goals and Objectives

The key objective is to identify, assess and determine a practical approach for member development into an accredited training program.

Anticipated Outcomes

- Increased succession planning for community members
- Increased community member training standards
- Increased cost savings with professional development within the community and surrounding communities.
- Increased career opportunities for community members

We conduct business both domestically and internationally. We pride ourselves on addressing the diverse legal, social and economic realities of working collaboratively with local Indigenous communities.

Meaningful Engagement with Indigenous Peoples

We are developing shared and long-term relationships with Indigenous communities and peoples which recognizes their unique history and allows us to learn and work collaboratively. We seek to understand how our operations may impact their interests and rights, and we actively pursue the essential involvement of Indigenous peoples in creating opportunities to manage any potential impacts.

We conduct our business in a manner respectful of Indigenous communities and peoples, taking into consideration their rights, interests and concerns. We are committed to creating a respectful and constructive working relationship.

Management Team

MIKE MILLER
CEO

Mike is known worldwide for his expertise and success in oilfield firefighting. His early career expertise in managing drilling and completion operations is combined with superior hydrocarbon firefighting and blowout control skills - a rare combination within this field. Mike has led SBI for over 40 years and continues to be a guiding force, and a resource for the company's leadership.

HEIDI LASANTE
VICE PRESIDENT

Heidi is our Vice President providing leadership, guidance, and strategic planning to the organization. She has been employed with Safety Boss since 2002 and brings over twenty years of business, administrative, and financial expertise. Heidi is a key member of our team because of her strategic planning skills and focus on company goals.

SONIA REHAL
Chief Financial Officer

Sonia is our CFO that provides financial, administrative governance and direction to the Safety Boss team. She is a CPA, CGA with 13 years' experience and has been employed with Safety Boss since 2015. Sonia is a asset to the SBI team based on her attention to detail and her commitment to the financial goals of the company.

SAFETY BOSS INC. - A FULL SERVICE INTERNATIONAL SAFETY COMPANY

CURTIS WRIGHT
GENERAL MANAGER

Curtis has been employed with Safety Boss since 2011. He brings over twenty years of industrial, municipal firefighting and training experience. His diversified experiences allowing him to be a key member of our first response well control team. Curtis' enthusiasm and loyalty to Safety Boss allow him to lead the Operations with drive.

ALYCE ADAMS
HSE MANAGER

Alyce provides support to our team and customers allowing them to operate safely and efficiently. She has been employed with Safety Boss since 2011 and brings over ten years of industry experience. Her medical, safety and logistical experiences make her a huge asset to our team.

ROB VELTHUIS KROEZE
FORT ST. JOHN STATION MANAGER

Rob is our Area Manager for our British Columbia operations. He has been employed with Safety Boss since 2014 and brings over ten years of industrial safety supervision and logistical coordination experience. Rob is a huge asset based on his diversified experiences making him a key member to our operational team.

Sales Team

TYLER FARMER

SALES MANAGER

O: (403) 261-5075 C: (403) 860-0655 E: TFARMER@SAFETYBOSS.COM

Based out of our Calgary, AB office, he has been employed with Safety Boss since 2015. Tyler has an exceptional background in sales and marketing with a proven track record of over 9 years in the Oil and Gas sector. Tyler is a huge asset and a key member of the management team.

DARREN JEFFERY

SALES AND MARKETING

O: (250) 785-2721 C: (250) 329-8755 E: DJEFFERY@SAFETYBOSS.COM

Focused on our British Columbia projects, Darren comes to our team with more than 10 years' experience in the Oil and Gas industry. His passion and drive to successfully deliver our services to the clients has made him a welcome addition to the team.

MONTY MASON

CORPORATE SALES AND MARKETING

O: (403) 261-5075 C: (403) 771-8665 E: MMASON@SAFETYBOSS.COM

Based our of our Calgary, AB office, he has been employed with Safety Boss since 2016. Monty came to Safety Boss with more than 30 years experience in the Oil and Gas industry. Monty's knowledge and expertise are an essential addition to our sales team.

DEAN MONTEREY

MANAGER – WILDLAND FIRE SERVICES

O: (780) 400-0690 C: (250) 268-4643 E: DMONTEREY@SAFETYBOSS.COM

Dean has more than 30 years' experience in the Oil and Gas Industry. He is a seasoned emergency manager with extensive international disaster management experience at senior levels and is a leader in Incident Command solutions. Dean has been a welcome addition to the Safety Boss team.

JOE GREEN

SALES AND MARKETING

O: (780) 400-0690 C: (780) 975-8067 E: JGREEN@SAFETYBOSS.COM

Focusing on our Alberta projects, Joe has more than seven years' experience in the Oil and Gas industry. His positive attitude, determination and sought after brisket has made him a great addition to our sales team and a favorite among our clients.

VICTORIA SEDGWICK

INDIGENOUS RELATIONS SENIOR ADVISOR

O: (403) 261-5075 E: VSEDGWICK@SAFETYBOSS.COM

Victoria's previous experience as the Indigenous and Community Liaison has allowed her to create long term relationships with Indigenous communities across Canada. She came highly recommended and respected with years of positive Indigenous relations experience.

In Memory of Mark Badick
